SKILLS

React   Node   JavaScript   TypeScript
Python   SQL   MongoDB   Git   Agile

PERSONAL PROJECTS

Job Listing Analyser
- Developed a Python-based command-line tool to scrape and analyze thousands of job listings, providing actionable insights into job market trends for recruiters and job seekers.
- Leveraged web scraping, data processing, and statistical analysis to extract and summarize key job market data, including top skills, in-demand job titles, and industry hotspots.
- Automated the generation of data-driven reports with CSV exports and visualizations, improving decision-making processes for career strategists and market researchers.

The Quizzical Trivia App
- Developed a responsive trivia app using React to fetch and display quiz questions from the Open Trivia Database API, improving API integration skills.
- Utilised React hooks (useState , useEffect) for state management and efficient rendering, demonstrating solid understanding of component-based architecture.
- Deployed the app on Netlify , showcasing proficiency in modern CI/CD practices and ensuring smooth user experience across devices.
